## ## 1. Executive Summary

### ### Introduction

Mumble Chat Token (MMCT) is designed to revolutionize social media by integrating blockchain technology to enhance privacy, security, and user rewards.

### ### Objective

The primary goal of the ICO is to raise funds to further develop and enhance the Mumble Chat platform, ensuring a secure and rewarding experience for users.

### ### Token Details

- **Token Name**: Mumble Chat Token (MMCT)
- **Total Supply**: 20,00,00,000 MMCT
- **Decimals**: 18
- **Blockchain**: Ramestta Network
- **Gas Fee**: RAMA
- **Burning MMCT per Transaction**: 0.01% to 0.5%

## ## 2. Introduction

### ### Mumble Chat Overview

Mumble Chat is a decentralized social media platform focused on user privacy and data security. It leverages blockchain technology to offer a transparent and rewarding ecosystem.

### ### Problem Statement

Current social media platforms face issues such as data breaches, lack of user rewards, and centralized control.

### ### Solution

MMCT addresses these issues by providing a secure, transparent platform where users are rewarded for their participation.

---

## ## 3. Market Analysis

### ### Industry Overview

The social media industry is rapidly growing, with increasing user demand for privacy and security. The cryptocurrency market is also expanding, offering new opportunities for integration.

### ### Target Audience

Primarily social media users and cryptocurrency enthusiasts who value privacy, security, and transparency.

### ### Competitive Analysis

MMCT's unique value proposition includes enhanced security features and a comprehensive rewards system, setting it apart from other social media platforms.

---

## ## 4. Tokenomics

### ### Token Details

- **Token Name**: Mumble Chat Token (MMCT)
- **Total Supply**: 20,00,00,000 MMCT
- **Decimals**: 18

### ### Initial Distribution

- **Private Sale 5%**: 1,00,00,000 MMCT at \$0.05
- **Pre-Sale 10%**: 2,00,00,000 MMCT at \$0.10
- **Public Sale 20%**: 4,00,00,000 MMCT at \$0.20

### ### Burning Mechanism

MMCT includes a burning mechanism where a portion of the tokens is periodically burned to decrease supply and potentially increase value.

**Dynamic Burn Rate**: The contract specifies a dynamic burn rate, which means that a percentage of tokens are burned upon each transfer. The initial burn rate is set at 0.01%, and there's a maximum allowable burn rate of 0.5%. This means that a fraction of the tokens transferred in each transaction will be burned, with the exact percentage determined by the current burn rate.

## ## 5. ICO Details

### ### ICO Phases

- **Private Sale**: \$0.05 per MMCT, 1,00,00,000 MMCT available
- **Pre-Sale**: \$0.10 per MMCT, 2,00,00,000 MMCT available
- **Public Sale**: \$0.20 per MMCT, 4,00,00,000 MMCT available

### ### Fund Allocation raised from ICO

- **Development**: 40%
- **Marketing**: 30%
- **Operations**: 20%
- **Legal and Compliance**: 10%

### ### Participation Details

Users can participate in the ICO through our official website, where they can purchase MMCT tokens minimum worth \$10 using smart contract call by Pair MMCT/RAMA

## ### 6 Mining/Minting Reward Benefit of MMCT for All ICO Members

### Benefits of the Reward Program

1. **Increased Participation**: Encourages users to actively participate in the ICO by offering various incentives.
2. **Referral Incentives**: Promotes network growth through referral bonuses, enhancing the platform's user base.
3. **Long-Term Engagement**: Rewards for holding and staking tokens encourage long-term commitment.
4. **Community Building**: Distributes rewards across the community, fostering a sense of collective benefit.
5. **Transparency and Trust**: Clear reward structures build trust and transparency within the ecosystem.

### ### Self Mining/Minting Speed per hour

#### \*\*Understanding Self-Minting and Reward Tiers\*\*

When you participate in the ICO by buying MMCT tokens, those tokens are locked in a contract for 365 days. As a result, you earn more tokens over time through a process called self-minting. The basic idea is that you get a small percentage of extra tokens every hour based on the amount you initially locked.

#### \*How It Works.\*

- When you buy MMCT tokens, they are locked in a contract.
- You earn a basic percentage of additional tokens every hour based on the amount you've locked.
- Referring friends increases your earning rate, so the more people you refer, the more you earn.
- Each tier has its own base rate and potential bonuses based on the number of referrals.

By understanding these tiers and the referral system, you can maximize your earnings in the ICO. The more you invest and the more people you refer, the higher your minting rewards will be over time.

#### ### Explanation of Self-Minting Process:

The self-minting process in the ICO allows users to buy MMCT tokens from the ICO portal. The purchased MMCT tokens are instantly locked in a contract, and users earn a basic minting rate of 0.001% per hour on their locked amount. Additionally, users can increase their minting percentage by referring direct users, according to the following tiers:

- **\*\*Starter Minting Speed\*\***: For investments between \$1 and \$100.
- **\*\*Silver Minting Speed\*\***: For investments between \$101 and \$500.
- **\*\*Gold Minting Speed\*\***: For investments between \$501 and \$2000.
- **\*\*Platinum Minting Speed\*\***: For investments between \$2001 and \$5000.

- **\*\*Diamond Minting Speed\*\***: For investments between \$5001 and \$15000.

- **\*\*Elite Minting Speed\*\***: For investments above \$15000.

Each tier has a base hourly minting percentage that increases with the number of referred members. The higher the tier, the higher the base minting percentage and potential booster percentages, leading to greater rewards over time.

### 1. **\*\*Starter Minting Speed (\$1 to \$100)\*\***

- You earn a base rate of 0.001% per hour.
- If you refer friends and they join, you can increase your earning rate. The more people you refer, the higher your bonus percentage.
- For example, with 1 referral, your rate goes up by 10%. With over 100 referrals, it can increase up to 300%

- The base rate here is slightly higher at 0.0011% per hour, after adding 10% on starter base speed 0.001%

- As with the Starter tier, referring friends boosts your earnings. With a few referrals, you could get a 10% boost, and with many referrals, up to 300%.

## 3. \*\*Gold Minting Speed (\$501 to \$2000)\*\*

- The base rate increases to 0.00115% per hour, after adding 15% on starter base speed 0.001%

- Referrals play the same role here, enhancing your base rate up to 300% if you refer more than 100 people.

The core benefit of MumbleChat MMCT self-minting lies in its unique structure that allows users to earn passive income on their locked MMCT tokens while also incentivizing community growth through referrals. Here are the key benefits:

### 1. \*\*Passive Income:\*\*

- Users earn a consistent, hourly return on their locked MMCT tokens. This creates a passive income stream that grows over time.

### 2. \*\*Increased Earnings with Referrals:\*\*

- The self-minting rate increases with the number of direct referrals a user makes. This means the more people you refer to the platform, the higher your earning rate becomes.

### 3. \*\*Compounding Effect:\*\*

- Since the minting happens hourly, users benefit from a compounding effect on their earnings, which can significantly increase the total amount earned over longer periods.

### 4. \*\*Tiered Investment Rewards:\*\*

- Different investment tiers provide varying base minting rates. Higher investment amounts unlock higher base rates and greater potential referral bonuses, rewarding larger investors with better returns.

#### 5. **Community Growth Incentive:**

- The referral system encourages users to grow the MumbleChat community, creating a network effect that can enhance the platform's value and utility.

#### 6. **Flexible Earnings:**

- Users can start with small investments and still benefit from self-minting. As their investment grows, or as they refer more users, they can move up to higher tiers with better rewards.

#### 7. **Long-Term Gains:**

- The structure of self-minting incentivizes holding MMCT tokens for longer periods, which can be beneficial for both the user and the overall stability and growth of the MumbleChat ecosystem.

In summary, the core benefit of MMCT self-minting is its ability to provide users with a scalable and incentivized passive income model, fostering both individual earnings and community expansion.

## ### One-Time Spot Reward

#### **Definition:**

- Immediate rewards are distributed when users lock or stake their MMCT tokens.

#### **How it Works:**

- **Distribution:** 10% of the principal amount is distributed to up to 15 levels of upline members.

#### **Upline Distribution:**

- Direct (L1): 5%

- L2 to L15: Varying percentages, with each level receiving a portion of the 10%.

## **\*\*Detailed MMCT Distribution from Locked MMCT:\*\***

You will receive MMCT from your depth team up to 15 levels as follows:

- **\*\*Direct from (L1):\*\* 5%**
- **\*\*Levels L2 to L4:\*\* 0.5% each**
- **\*\*Levels L5 to L7:\*\* 0.3% each**
- **\*\*Levels L8 to L12:\*\* 0.2% each**
- **\*\*Levels L13 to L14:\*\* 0.5% each**
- **\*\*Level L15:\*\* 0.6%**

## **\*\*Benefits:\*\***

### **1. \*\*Immediate Incentivization:\*\***

- Users are rewarded immediately upon staking their MMCT tokens, providing instant gratification and encouraging further participation.

### **2. \*\*Enhanced Earnings:\*\***

- By distributing rewards across multiple levels, users can potentially earn more by building a strong network. The more active and engaged your referrals are, the higher your potential earnings.

### **3. \*\*Promotes Network Growth:\*\***

- The multi-level distribution model incentivizes users to refer others and grow the network. Each new participant can benefit not only themselves but also their uplines, creating a robust and expanding community.

### **4. \*\*Sustained Engagement:\*\***

- The tiered reward system keeps users engaged over the long term. As they see the benefits of their direct and indirect efforts, they are more likely to continue participating and contributing to the network.

## 5. **Compounding Benefits:**

- As more users join and stake their MMCT tokens, the overall pool of rewards increases. This compounding effect can lead to significant earnings over time for active participants.

## 6. **Trust and Confidence:**

- Immediate rewards build trust in the system. Users see tangible benefits right away, which can increase their confidence in the platform and encourage further investment and participation.

## **Additional Information:**

- **Flexibility:** The system is designed to reward both small and large investors. Whether you have a small stake or a significant amount of MMCT tokens, you can benefit from the One-Time Spot Reward program.

- **Scalability:** As the network grows, the potential for higher earnings increases. The system is scalable and can handle a growing number of participants without diluting individual rewards.

- **Community Building:** This reward mechanism fosters a sense of community and collaboration. Users are motivated to help each other succeed, creating a positive and supportive environment.

By participating in the One-Time Spot Reward program, users not only earn immediate rewards but also contribute to the overall growth and success of the MumbleChat platform. This creates a win-win situation where both individual and community benefits are maximized.

Certainly! Here's an expanded explanation highlighting the benefits of the Depth Team Mining/Minting MMCT Reward Earning program:

## **Depth Team Mining/Minting MMCT Reward Earning**

It's a powerful incentive program designed to foster the growth and development of a dynamic network of participants. By participating in this program, you not only have the opportunity to earn based on your individual efforts but also benefit from the collective success of your network down to 15 levels deep.

## **Key Benefits:**

1. **Passive Income Generation**: By referring others to join the program, you unlock the potential for passive income generation. As your network grows, so does your earning potential, allowing you to reap the rewards of your efforts over time.

2. **Multiplier Effect**: The program's multi-level structure ensures that your earnings can grow exponentially as your network expands. By earning a percentage of the earnings generated by members in your network across multiple levels, you can leverage the power of compounding to maximize your returns.

3. **Incentivized Growth**: With attractive earning percentages allocated to each level of your network, you're incentivized to actively support the growth of your network. Whether it's through direct referrals or assisting your team members in expanding their own networks, every contribution you make can translate into increased earnings for both you and your network.

4. **Diverse Income Streams**: The program offers multiple streams of income, allowing you to earn from various levels of your network. This diversification helps mitigate risk and provides stability in your earnings, even as market conditions fluctuate.

5. **Community Building**: As you work together with your network to achieve common goals, you'll build strong relationships and a sense of community. This collaborative environment fosters trust, mutual support, and camaraderie among participants, enhancing the overall experience of being part of the program.

6. **Financial Freedom**: By actively participating in the Depth Team Mining/Minting MMCT Reward Earning program and building a robust network, you have the potential to achieve financial freedom and independence. Whether it's supplementing your existing income or creating a full-time source of revenue, the program offers the flexibility to tailor your earnings to your financial goals.

Certainly! Let's break down the concept of Depth Team Mining/Minting MMCT Reward Earning and explore it further.

Depth Team Mining/Minting MMCT Reward Earning is a mechanism designed to incentivize both individual users and their network of supporters within a multi-level structure. Here's how it works:

1. **Hourly Earnings Distribution**: Users earn rewards hourly, and 25% of their earnings are distributed among their upline supporters within a 15-level structure, and the same percentage you will get from your depth team structure as details given below :-

## 2. **Depth Team Receiving Percentage Breakdown**:

- **From all Direct (L1)**: 10%
- **L2-L4**: 2% each
- **L5-L7**: 0.5% each
- **L8-L10**: 0.3% each
- **L11-L12**: 0.2% each
- **L13**: 0.2%
- **L14**: 1%
- **L15**: 5%

Let's break this down further:

- **Direct (L1)**: When a user earns rewards, 10% of that earning is distributed among their direct upline supporters, meaning those who directly referred them to the platform or program, it means this percentage is received by you from all your direct referrals.
- **L2-L4**: The subsequent levels, from L2 to L4, you will receive 2% from each.
- **L5-L7**: From Levels 5 to 7 you will receive a smaller percentage of 0.5% each. As the depth increases, the percentage decreases, but it still offers an incentive for those further up in the network to support your downline.
- **L8-L10 and Beyond**: The percentages continue to decrease as the depth increases, down to 0.3% for levels 8 to 10, and further down to 0.2% for levels 11 to 12. This ensures that even users deep within the network structure you receive some rewards for their support.
- **L13, L14, L15**: The distribution percentages for levels 13, 14, and 15 are slightly higher, with level 13 you receiving 0.2%, level 14 receiving 1%, and level 15 you will receiving 5%. This provides a significant incentive for those at the deepest levels of the network to continue supporting and encouraging growth.

This structure encourages users not only to earn rewards for themselves but also to support and incentivize their network of supporters to build a strong and deep community, ultimately benefiting everyone involved. It's a model that rewards both individual effort and collective growth within a network.

In conclusion, the Depth Team Mining/Minting MMCT Reward Earning program presents a unique opportunity to generate passive income, foster community engagement, and work towards financial freedom through network building and collaboration. By leveraging the program's benefits and incentives, you can embark on a rewarding journey towards achieving your financial aspirations.

## ## 7. Use of Funds

### ### Development

40% of the funds will be allocated to the development of the Mumble Chat platform, including software development, testing, and deployment.

### ### Marketing

30% of the funds will be used for marketing and promotional activities to increase the adoption of MMCT and attract users to the platform.

### ### Operations

20% will be allocated to operational costs, including team salaries, infrastructure, and other expenses necessary to maintain and grow the platform.

### ### Legal and Compliance

10% will be used to ensure that MMCT complies with all relevant regulations and to cover legal expenses.

---

## ### 8 Roadmap for MMCT

### ### Q2 2024

- \*\*Launch of MMCT ICO\*\*:
- Begin initial marketing and outreach for the ICO.
- Develop ICO smart contracts and platform.

### ### Q3 2024

- **Completion of ICO All Phases**:
  - Execute ICO marketing campaigns.
  - Conduct public and private sale phases.
  - Finalize token distribution and allocation.

### ### Q4 2024

- **Launch MMCT Platform**:
  - Develop and test the MMCT platform.
  - Implement necessary security measures.
  - Ensure compliance with regulations.
  - Launch the MMCT platform to the public.

### ### Q1 2025

- **Integration**:
  - Foster partnerships and collaborations.
